EXPERIENCE

Catalyte, Chicago, IL— *Software Engineer*

July 2019 - PRESENT

- ❏ Integrating with Salesforce APIs, aiming for data consolidation and centralized source of truth, resulting in an improved sales cycle for major business value.
- ❏ Building middle layer microservices for the client and contact domain, improving business operations.
- ❏ Creating self management tools to onboard clients and manage user access and permissions.

Tools - Spring, Angular, MongoDB, SQL, Docker

Citi Bank, Irving TX — *Web Developer*

August 2017 - July 2019

- ❏ Built a new credit card servicing web app, with components scalable across various client platforms.
- ❏ Integrate with existing microservices and APIs using Spring Boot.
- ❏ Architected an omnichannel application design to make account data available, across all Citi retail credit card services, in real-time.

Tools - Javascript, Angular 5, Typescript, Java, Gulp

Conversant, Chicago IL — *Software Engineer Apprentice*

June 2016 - July 2017

- ❏ Tested the real-time bidding framework to maximize consumer outreach, meet client goals and find process inefficiencies in a programmatic manner.
- ❏ Worked with teams to provide support for post-OS server applications, using Puppet for automation.
- ❏ Utilized open source technologies such as Jenkins to replicate the holistic impact of applications on production servers throughout the country.

Tools - Java, Gulp, Puppet, RSpec, Python, Bash, Jenkins, Linux

EDUCATION

Loyola University of Chicago, Chicago IL — *Computer Science*

August 2013 - May 2016

Coding Languages

Javascript

Java

HTML5/CSS3

Angular 2+

React

Typescript

Python

Tools I've used

Docker

MongoDB

SQL/PostgreSQL

AWS

GCP

PCF

Jenkins

Visual Studio

IntelliJ

PyCharm

Jupyter
